

Ideation Phase

Define the Problem Statements

Date	01/10/2026
Team ID	SWTID-2026-1051
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create problem statements from the Incident user's point of view. The statements follow the reference structure: I am / I'm trying to / But / Because / Which makes me feel.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	a ServiceNow Incident user	create and save a High Impact Incident with the correct assignment information	required information can be missed and the record may be submitted with incomplete assignment details	Incident forms need dynamic mandatory-field validation based on Impact	uncertain and frustrated when the form does not clearly guide me
PS-2	a ServiceNow Incident user/admin	update an Incident efficiently while keeping urgency and State changes controlled	fields may require manual correction or State can be changed directly from list editing	different Incident actions need controlled, context-aware Client Script and UI Policy behaviour	concerned about inconsistent Incident data and extra rework

Problem Definition

The project addresses inconsistent Incident form behaviour by applying dynamic UI rules and Client Scripts so that field requirements, automatic urgency updates, save validation and State editing restrictions respond to the Incident context.
