

Project Design Phase

Problem – Solution Fit Template

Date	01/10/2026
Team ID	SWTID-2026-1051
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	2 Marks

Problem – Solution Fit:

The Problem–Solution Fit describes the relationship between the Incident-management problems observed in the ServiceNow workflow and the proposed UI Policy and Client Script controls that address them.

Implement Client Script & UI Policy (Incident)

Problem-Solution Fit Canvas 2.0

Implement Client Script & UI Policy (Incident)

Purpose / Vision: Improve Incident-form usability, data consistency and controlled user interaction in ServiceNow.

1. CUSTOMER SEGMENT(S)

ServiceNow Incident users
ServiceNow administrators / developers
Teams managing Incident records

6. CUSTOMER CONSTRAINTS

Limited user attention
Incorrect or incomplete field entry
Need to work within ServiceNow platform controls

5. AVAILABLE SOLUTIONS

Manual field checking
Existing UI Policies
Client Scripts
Native ServiceNow validation and form controls

2. JOBS-TO-BE-DONE / PROBLEMS

Create and update Incident records
Ensure required assignment information
Prevent invalid submission
Prevent uncontrolled State list editing

9. PROBLEM ROOT CAUSE

Field rules depend on Incident context
Users may leave related fields incomplete
Different entry paths need consistent controls

7. BEHAVIOUR

Select Impact
Enter assignment details
Submit / update Incident
Attempt list editing when needed

3. TRIGGERS

Impact changes to High
User attempts to submit without Assigned To
User attempts to edit State in list view

10. YOUR SOLUTION

High Impact UI Policy
onChange Urgency automation
onSubmit validation
onCellEdit State protection
Reverse-if-false behaviour

8. CHANNELS OF BEHAVIOUR

8.1 ONLINE: ServiceNow Incident form, Incident list
8.2 OFFLINE: Not applicable for this platform-native workflow

Implement Client Script & UI Policy (Incident)
