

ServiceNow Incident Customer Journey Map

Scenario: Creating, validating, saving and updating an Incident record

SERVICE NOW INCIDENT — CUSTOMER JOURNEY MAP

Scenario: Creating, validating, saving and updating an Incident

	Enter	Create	Validate	Save / Update	Maintain
	Open Incident form	Enter Impact & assignment	Trigger UI rules	Submit / update	Use list or form
Initial	Browser + form	Impact / Assigned To	UI Policy + Client Scripts	Save validation	onCellEdit / form
Goal	Start a valid record	Enter correct details	Get automatic guidance	Save without errors	Keep data controlled
Position	Clear form	Urgency auto-set	Mandatory state visible	Successful save	Predictable behaviour
Legal	Unclear fields	Missing assignment	Unexpected validation	Save blocked when invalid	State edit attempted
Reason	Simple form guidance	Dynamic field behaviour	Clear messages	Consistent validation	Controlled list editing
