

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	31 January 2025
Team ID	_____
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Incident Creation & Data Entry	Create an Incident record with required core fields such as Short description and Impact.
FR-2	High Impact Field Control	When Impact is 1 - High, Assignment group becomes mandatory and Urgency becomes read-only.
FR-3	Urgency Automation	When Impact changes to 1 - High, automatically set Urgency to 1 - High and display an informational message.
FR-4	Save Validation	When Impact is High and Assigned To is empty, prevent submission and display a clear validation message.
FR-5	Reverse Condition Behaviour	When Impact changes from High to Medium, reverse the High Impact UI Policy actions and restore normal editability.
FR-6	List Edit Protection	Prevent direct State changes through Incident list editing and instruct the user to open the Incident.
FR-7	Incident Update	Allow a valid Incident to be saved/updated when required conditions are satisfied.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	Field behaviour and validation messages should be clear and understandable to Incident users.
NFR-2	Security	Client-side controls complement ServiceNow access controls; they do not replace server-side authorization.
NFR-3	Reliability	Rules should behave consistently on form load, field change, submit and list edit.
NFR-4	Performance	Client logic should remain lightweight and execute only for relevant events.
NFR-5	Availability	The solution operates within the availability of the ServiceNow instance and browser session.
NFR-6	Scalability	The configuration is reusable across Incident records without unnecessary external services.
