

Project Design Phase

Proposed Solution Template

Date	1 October 2026
Team ID	_____
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Incident users need controlled, context-sensitive field behaviour. High Impact incidents must enforce assignment information, automate Urgency, prevent invalid submission, and prevent direct State changes through list editing.
2.	Idea / Solution description	Implement a ServiceNow Incident solution using one High Impact UI Policy and Client Scripts for onChange, onSubmit and onCellEdit events.
3.	Novelty / Uniqueness	Combine declarative UI Policy behaviour with event-specific Client Scripts for automatic Urgency, save validation, reverse-condition behaviour and list-edit protection.
4.	Social Impact / Customer Satisfaction	Reduce avoidable data-entry errors, provide immediate feedback, make Incident handling predictable and support cleaner Incident records.
5.	Business Model (Revenue Model)	This is an internal micro-project. If packaged as a service, value can be delivered through ServiceNow configuration, implementation and maintenance services.
6.	Scalability of the Solution	Rules are attached to the Incident table and can be reused across Incident records; additional policies/scripts can support future requirements.
