

Project Design Phase

Solution Architecture

Date	1 October 2026
Team ID	_____
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture bridges the project problem and the technology implementation. For this project, the architecture defines the Incident user interface, UI Policy controls, Client Scripts, ServiceNow Incident data and validation feedback flow.

- Find the appropriate ServiceNow configuration to solve the Incident data-entry problem.
- Describe the structure and behaviour of the Incident form and list controls.
- Define the UI Policy and Client Script features used by the solution.
- Provide a clear implementation flow that can be configured, tested and maintained in ServiceNow.
