

Acceptance Testing

UAT Execution & Report Submission

Date	01 October 2026
Team ID	_____
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	4 Marks

1. Purpose of Document

The purpose of this document is to briefly explain the test coverage and open issues of the ServiceNow Incident project at the time of release to User Acceptance Testing (UAT).

2. Defect Analysis

This report shows the number of resolved or closed bugs at each severity level, and how they were resolved.

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	0	0	0	0	0
Duplicate	0	0	0	0	0
External	0	0	0	0	0
Fixed	0	0	0	0	0
Not Reproduced	0	0	0	0	0
Skipped	0	0	0	0	0
Won't Fix	0	0	0	0	0
Totals	0	0	0	0	0

3. Test Case Analysis

This report shows the number of test cases that have passed, failed, and are untested.

Section	Total Cases	Not Tested	Fail	Pass
UI Policy / Client Scripts	6	0	0	6
Incident Save / Update	2	0	0	2
List Edit Protection	1	0	0	1
Overall UAT	9	0	0	9

UAT Evidence Summary

The UAT execution covered the core behaviours implemented in the ServiceNow Incident micro-project.

Test Area	Evidence / Result	Status
High Impact UI Policy	Impact = 1 - High activates Assignment group mandatory behaviour and Urgency read-only behaviour.	PASS
Urgency Automation	onChange sets Urgency to 1 - High when Impact becomes High.	PASS
Save Validation	High Impact + empty Assigned To is prevented from saving and displays the validation message.	PASS
Successful Save	High Impact Incident with Assigned To populated saves successfully.	PASS
Reverse Condition	Changing Impact from High to Medium reverses the configured UI Policy behaviour.	PASS
List Edit Blocking	Direct State list editing is blocked with the configured alert.	PASS

Open Issues

No confirmed functional defects were recorded in the executed UAT scenarios. Quantitative performance timing was not instrumented and is therefore not reported as a measured value.
