

Ideation Phase

Empathize & Discover

Date	31 January 2025
Team ID	_____
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map captures knowledge about a user's behaviours and attitudes. For this project, the map represents a ServiceNow Incident user who needs to create, update and manage Incident records accurately.

The exercise focuses on the user's goals and challenges while working with Impact, Assignment group, Assigned To, Urgency, State and Incident submission behaviour.

Project Empathy Map — ServiceNow Incident User

THINK & FEEL

- Wants correct Incident data
- Wants clear validation
- Worries about incomplete records
- Wants predictable field behaviour

HEAR	SERVICE NOW INCIDENT USER	SEE
• Team/admin instructions • Incident handling rules • Validation feedback • Guidance for State changes	Creates • Updates • Validates	• Impact and Urgency fields • Mandatory indicators • Validation messages • Incident list and form views
SAY & DO		GOALS / GAIN
• Creates and updates Incidents • Assigns users/groups • Changes Impact • Uses form and list views		• Save valid records • Correct urgency automation • Clear form behaviour • Faster handling
PAIN	NEEDS / GAIN	
• Missing information • Incorrect values • Unexpected save failures • Uncontrolled list editing	• Dynamic field rules • Automatic updates • Save validation • Controlled State editing	

Project Context

The project uses a High Impact UI Policy together with onChange, onSubmit and onCellEdit Client Scripts to make Incident entry more consistent, automate urgency handling, prevent invalid submission and block State changes through list editing.
